

# EMU SPIRIT 100% EMU OIL

The emu is one of the species of ostrich-like flat-breasted birds (flightless birds).

It has long been considered an unreal bird by chemists, and the oil obtained from its fat has been used extensively by the Aborigines, the indigenous people of Australia, to treat wounds, burns, and skin problems.

In modern times, the oil is used to treat skin problems such as dry skin, rough skin, and wrinkles, and athletes around the world use it to reduce and relieve muscle and joint pain.

## Composition

INCI : EMU OIL  
CAS No. : 158570-96-8

## Application

● Massage oil ● Cream  
● Soap · Body soap

## Features

- TGA (Therapeutic Goods Administration) · Public Summary
- JSQI2006 · EU standard · Chinese INCI Name
- Natural Omega-3.6.9 fatty acid containing
- Carry-over component (tocopherol), residual agricultural chemicals, genetically modified cereal feed, no use
- Government of Australia "Emu breeding license" acquired Farm (no use of antibiotics · growth promoter)

## Fatty acid composition (%)

Lauric acid	C12	>0.1
Myristic acid	C14	0.2
Palmitic acid	C-16	25.1
Palmitoleic acid	C-16:1	4.8
Stearic acid	C-18	10.1
Oleic acid	C-18:1	55.1
Linoleic acid	C-18:2	4.4
Linolenic acid	C-18:3	0.3
Arachidic acid	C20	>0.1

## TGA Effect / efficacy

- Relief of joint pain
- Reduce inflammation of arthritis
- Relief of the symptoms of eczema
- Relaxation of muscle pain
- Relaxation of premenstrual symptoms / syndromes
- Relief of arthritis pain
- Relaxation of the effect of skin psoriasis

Emu Oil : its anti-inflammatory properties : a report for the Rural Industries Research and Development Corporation / by J.M. Snowden, P.J. O'Malley and T.M. Ellis. Snowden, John M. 1999
